Revenue Generated by Gender

Category Distribution by Payment Method

KPI's :

Designed KPI cards to track revenue (2.37M), Total customer (1000), Total Transaction (1000), and Total Unit Sold (2981), Top Product Category (Clothing) for business decision-making.

Shopping Distribution by Gender :

This chart visualizes shopping distribution by gender using purchase count, helping identify dominant customer segments.

Total Products Sold by Gender :

Products were sold more to the gender with higher total quantity, indicating a stronger customer base in that segment.

Payment Method vs Purchase Category

payment_method	Books	Clothing	Cosmetics	Food & Beverage
Cash	86	391	199	
Credit Card	82	300	204	
Debit Card	28	286	70	
Total	196	977	473

Customer Data Analysis

Some of Revenue by Age and Gender

age (bins)	Female	Male	Total
10	32,418.15	39,653.33	72,071.48
50	2,19,335.02	1,38,592.16	3,57,927.18
30	1,61,921.07	2,02,040.06	3,63,961.13
20	2,56,048.57	1,98,626.79	4,54,675.36
40	3,60,471.94	1,54,658.66	5,15,130.60
60	3,78,686.36	2,22,915.66	6,01,602.02
Total	14,08,881.11	9,56,486.66	23,65,367.77

Purchase Category Distribution by Gender :

A stacked bar chart is more effective than a clustered bar chart for showing category demand along with gender contribution in a compact and readable way.

Shopping Distribution by Age Group :

A line chart with markers is more effective than a column chart for visualizing shopping trends across age groups while comparing gender.

Products Sold by Age Category :

A clustered column chart is more effective than a 100% stacked bar chart for comparing actual products sold across age groups and gender.

Revenue Generated by Age Category :

Middle-aged customer groups contribute the highest revenue, indicating strong purchasing power.

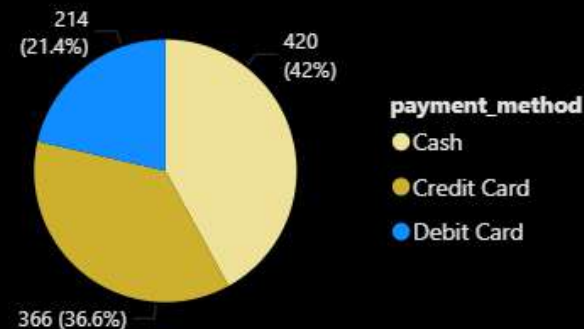

Purchase Category Distribution by Gender :

Purchase category distribution varies across gender, payment methods, and shopping locations, highlighting customer preferences.
